REPUBLIC OF SOUTH AFRICA

UWC-SLCA SCIENCE ROADSHOW ON WEST COAST as part of National Science Week Saturday 28 July to Friday 3 August 2018

The National Science Week, an initiative of the Department of Science and Technology (DST), is a countrywide celebration of science involving various stakeholders and role players in science. The National Science Week is conducted in all nine provinces simultaneously at multiple sites per province. In addition to promoting science, engineering and technology to various sections of the population, the National Science Week is intended to expose learners, educators, parents and the public audience to science careers, opportunities and events particularly in disadvantaged sections of the population.

The **Science Learning Centre for Africa** of the University of the Western Cape (UWC-SLCA) has scheduled a series of science enhancement events to promote this week. The staff of the UWC-SLCA will conduct a science road show to schools on the West Coast of the Western Cape (Langebaan, Lamberts Bay, Clanwilliam and Vredendal) to promote science as an important discipline for learners to follow and to encourage schools to develop science clubs and science-related activities for learners and teachers. Other science promotion activities will be conducted on UWC campus and in the surrounding schools. The NSW theme for 2018 is “**Deepening our democracy through science**” and therefore most of the science activities will be geared to promote this theme.

The UWC-SLCA team will visit a total of eleven schools and one shopping mall on the West Coast where a series of science promotion events, exhibitions and science related activities will be held with learners of the respective schools and the public in general. All activities will be directed at improved awareness and involvement in science and a general understanding and appreciation for the value added by science.

The programme for the UWC-Science Learning Centre’s visits to schools on the West Coast is attached.

Prof. M.S. Hartley, Director: UWC Science Learning Centre for Africa
